01 A Message TO INVESTORS

Hello Investors,

You are rightfully here to make money. However, for you to make money, we need our token to sustain for a very long time. One way to do that is to provide a long-term value proposition that is trustworthy. Therefore, we have implemented one of a kind automatic reward and token circulation system that maintains balance between supply and demand and use Dogecoin as reward. Yes, each transaction converts 3% to static reward. When amount of tokens is greater than 0.002% of the total supply, reward fee will be automatically swapped to Dogecoin for token holders. On top, we have implemented a decentralized swap, because- well, our blockchain engineers love building systems and platforms for easy use for all.

We also need a great influencer. Who other than **Elon Musk** himself to influence the universe as he is the true SPACEGOD!

02 CORE VALUES

TRANSPARENCY	COMMUNITY
 <p>Being decentralized in nature, there is no single organization or authority to manage any portfolio of Spacegod ecosystem. Every single transaction is 100% trackable.</p>	 <p>The beauty of blockchain is it can be authored and controlled collectively by the community. The creators of Spacegod cannot act as the God. Even the whales cannot manipulate due to built-in code level constraints.</p>

FOR HUMANS	TECHNOLOGY STACK
 <p>We believe in building better communities. Spacegod's smart contract is fully automated and can be used for both financial and non-financial transactional daily needs.</p>	 <p>Spacegod is running on BSC ecosystem which is highly energy efficient, thus eco-friendly; lightning fast, and above all, actually works in all sort of daily financial and transactional needs.</p>

03 SPACEGOD ECOSYSTEM

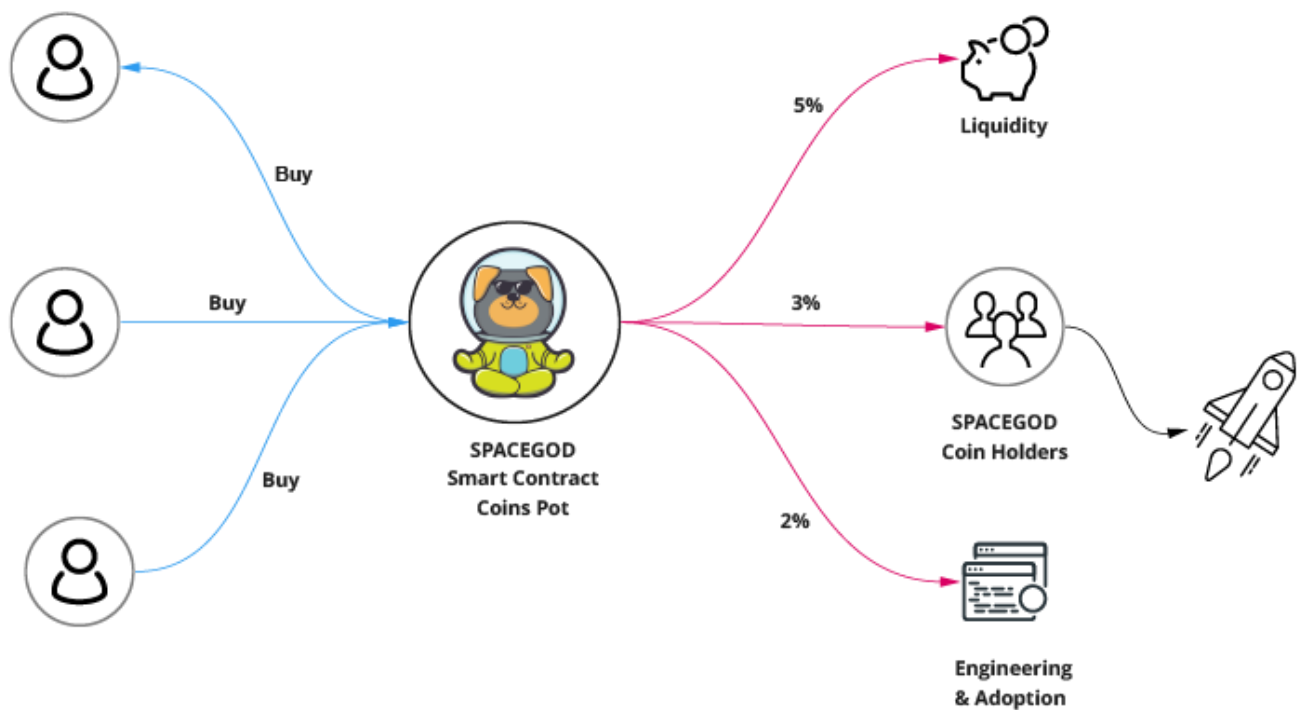

Name : Spacegod

Symbol : SPACEGOD

SPACEGOD HAS-

- a. Locked Liquidity – guaranteed **NO** ‘rugpull’
- b. Anti-Whale Mechanics
- c. Static rewards, paid in Dogecoin
- d. Automatic Liquidity Generation
- e. Honeypot-free code

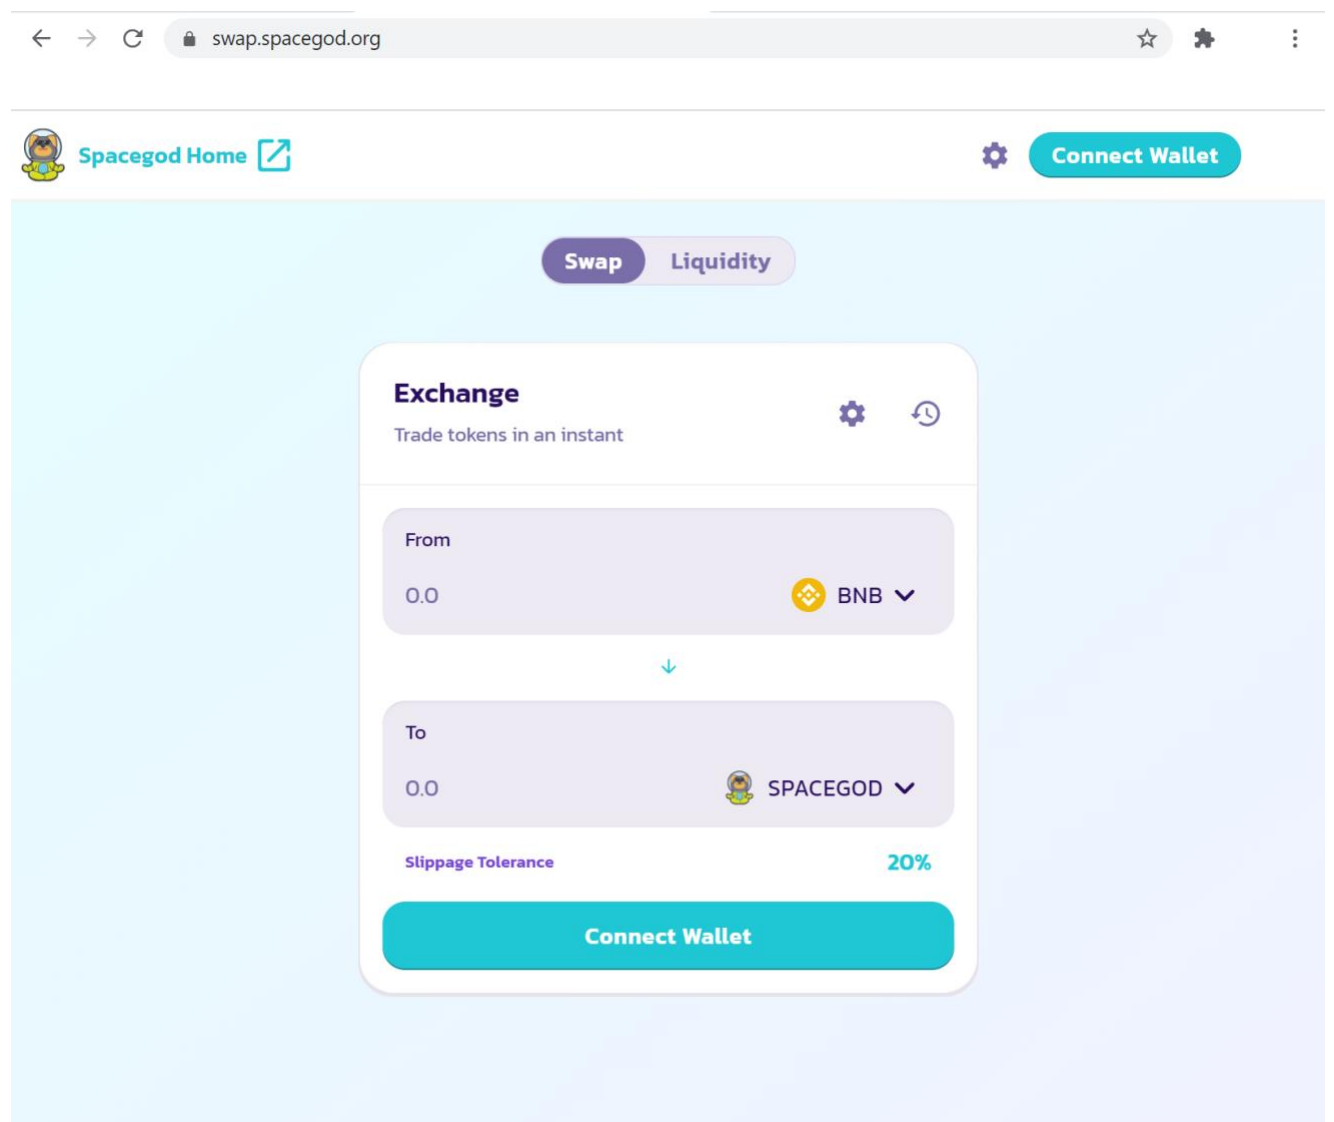

Here’s a basic transaction workflow in SPACEGOD ecosystem:

04 NATIVE SWAP APP

SPACEGOD is the first humanity driven decentralized ecosystem that offers its own SWAP platform from day 1.

You can visit <https://swap.spacegod.org/> and start swapping right away!

05 TOKENOMICS

SPACEGOD executes 4 simple functions on each trade: Reflection, Liquidity Pool acquisition, Burn-In each trade, continuous engineering support. Each transaction is taxed a 10% fee, which is split 3 ways.

5%

5% fee is split 50/50, half of which is sold by the contract into BNB, while the other half of the SPACEGOD tokens are paired automatically with the previously mentioned BNB and added as a liquidity pair on Pancake Swap.

3%

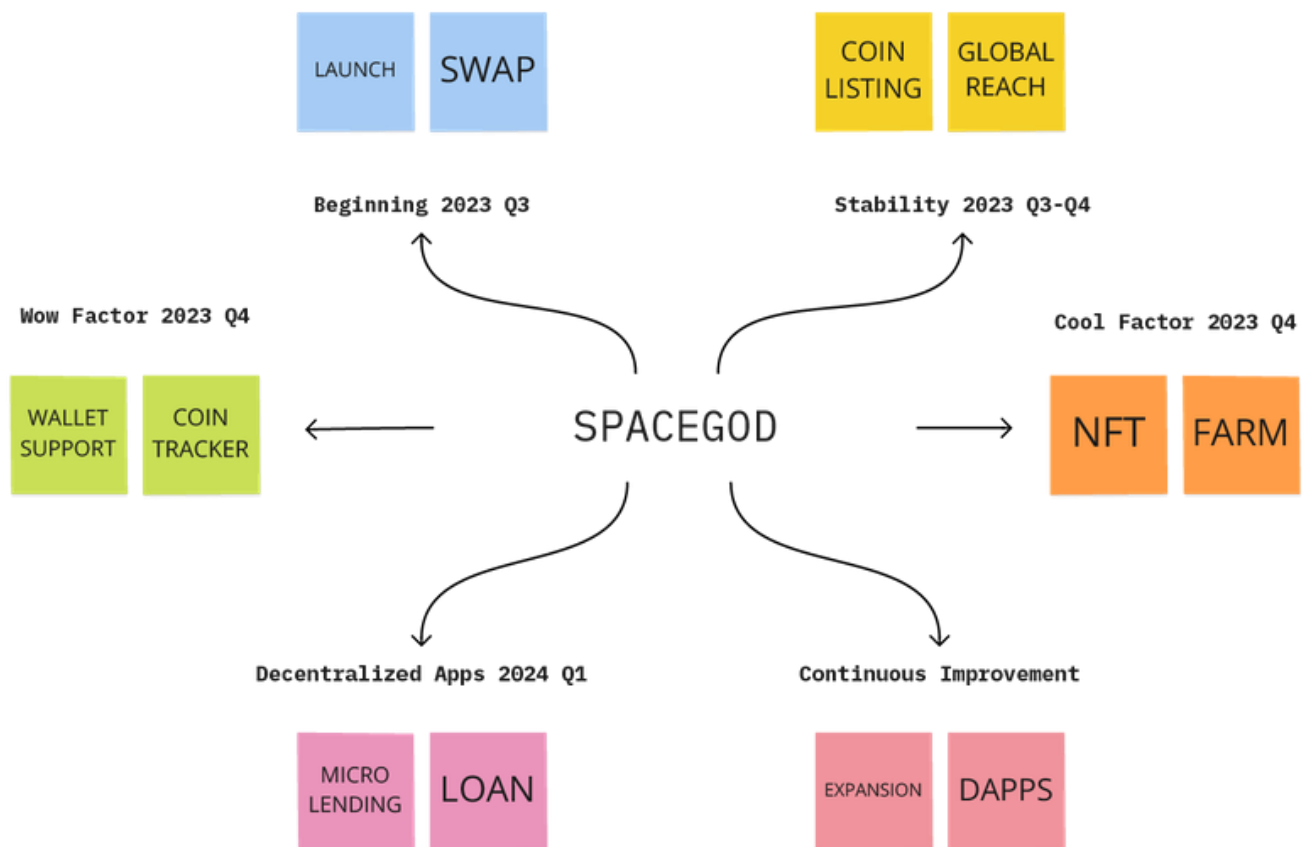

3% fee is converted to Dogecoin and redistributed to all existing SPACEGOD holders

2%

The remaining 2% fee goes to support continuous blockchain engineering and marketing

06 ROADMAP

SPACEGOD aspires to replace all community tokens and rule the free world. Our immediate roadmap includes exchange and coin listings, native wallet, NFT, farming, lending, and much more.
